## TekTone® Onsite Training Requirements

Thank you for interest in providing Tek-CARE® 400 and Tek-CARE® 500 training at your facility. Our instructor, Brian Guercio, has more than 11 years' technical experience with all of our products, including our nurse call and wireless emergency call systems.

Allow three full days for each training session. We can train a maximum of 8 people per session. Consecutive sessions are available at a discounted rate.

Please have the following ready, so that we can get the most out of the time allotted:

- A suitable meeting room with adequate work space and three 8' tables for demonstration equipment.
- An NC400DEM Tek-CARE® 400 demo system.
- A projection screen and white board (blackboard or easel) for notes and drawings.
- A projector. (If you do not have a projector, let us know in advance and we will bring one.)
- For each trainee: A set of tools typical for this type of work, such as strippers, crimps, cutters, meter, RJ style connection tool, cable tester, laptop, etc.
- Spare or scrap 18–22 AWG multi-conductor wire, CAT5 or CAT6 wire, crimp connectors, 8P8C connectors and 6P6C connectors for the hands-on portion of training.

Please also make arrangements to have lunch delivered to the meeting room so that training can continue with minimal interruption.
