for today... and tomorrow

TekTone® Onsite Training Requirements

Thank you for your interest in providing Tek-CARE® NC300II and Tek-CARE® 500 training at your facility. Our instructor, Brian Guercio, has more than 11 years' technical experience with all of our products, including our nurse call and wireless emergency call systems.

Allow two full days for each training session. We can train a maximum of 8 people per session. Consecutive sessions are available at a discounted rate.

Please have the following ready, so that we can get the most out of the time allotted:

- A suitable meeting room with adequate work space and two 8' tables for demonstration equipment.
- A projection screen and white board (blackboard or easel) for notes and drawings.
- A projector. (If you do not have a projector, let us know in advance and we will bring one.)
- For each trainee: A set of tools typical for this type of work, such as strippers, crimps, cutters, meter, etc.
- Spare or scrap 18–22 AWG multi-conductor wire and crimp connectors for the hands-on portion of training.

Please also make arrangements to have lunch delivered to the meeting room so that training can continue with minimal interruption.
