

TekTone®

COMMUNICATIONS FOR TODAY... AND TOMORROW.

Tek-SAFE®

area of rescue assistance system

EMERGENCY
INTERCOM SYSTEM

AREA OF RESCUE

An emergency intercom system that allows people who are unable to reach safety by themselves to summon assistance from rescue personnel.

COMMUNICATION

Tek-SAFE's master station has sensitive 2-way communication to the remote call stations, and can also initiate call tones to them.

SAFETY

Tek-SAFE meets the Americans with Disabilities Act (ADA) requirements for area of rescue assistance systems (previously called area of refuge systems).

Tek-SAFE Features & Components

NC150R Master Station

Tek-SAFE® provides audio communication between area of rescue stations (in protected stairwells) and the building lobby.

Calls are indicated at the NC150R master station by both visual and audible signals. The master station also has sensitive two-way communication to IR150SS remote call stations. Tek-SAFE® meets ADA requirements for area of rescue assistance systems (check local codes for additional requirements).

The NC150R master station panel is constructed of extruded aluminum, and may be flush, surface or desk mounted. IR150SS-series remote call stations are constructed of stainless steel, and are available in flush and surface mount versions. IR150SS-series stations are both vandal resistant and weather resistant, and may be located under an overhanging roof—in a parking garage stairwell, for example.
