

### Features

- Single-gang mounting
- 2 or 4 pole switches
- Flame retardant (UL 94V-0) plastic panel
- Highly visible emergency labeling
- May use with central annunciator, or for local alarm functions

### Description

The SF117-series Emergency Call Switch is available in two models and features a rugged, long-life, positive-acting switch mounted on a durable flame retardant (UL® 94V-0) plastic panel. Signaling an emergency requires just a short pull in any direction on the 6' long nylon cord. The signal cannot be canceled except at the point of origin. The SF117/2C provides two circuits to operate a separate visual and audible signal. The SF117/4C provides two additional circuits that may be used to operate additional signaling devices as needed.

### Specifications

Dimensions:	4.5"H × 2.75"W × 1.5"D (114 mm × 70 mm × 38 mm)
Panel:	Flame retardant (UL 94V-0) plastic
Switch:	SF117/2C: DPDT SF117/4C: 4PDT
Connections:	Wire leads
Mounting:	Standard single-gang electrical box
Legend:	Pad-printed <b>EMERGENCY</b>

SF117/2C, SF117/4C Emergency Call Switch

### Required Components

*Standalone:*

SS106 Transformer  
LI381 or LI123B Corridor Light

*System:*

CM800 Emergency Call System
