About Our TEP Program

TekTone **TEP** **elite** Partner

TekTone Elite Partners (TEPs) are distributors of TekTone products who are authorized and trained to sell, install, and service the Tek-CARE700 wander management system, The Tek-CARE750 fall detection and monitoring system, the Tek-CARE120 and Tek-CARE160, and Tek-CARE400 GEN3 nurse call systems.

TEPs know the importance of system performance and reliability in the healthcare market and have factory-trained technicians to provide service and maintenance agreements 24 hours a day, 7 days a week.

This successful program allows a healthcare facility to work directly with a dedicated systems integrator within their region. This close partnership ensures that the facility's goals are being met by the most efficient means possible.

Fall Detection & Monitoring

The Tek-CARE®750 offers fall detection and monitoring integrated with Tek-CARE nurse and emergency call systems using sensing by Vayyar.

The Tek-CARE750 sensors use optics-free (no camera) RADAR technology to provide 24-7 touchless monitoring.

The fall detection sensor works in all lighting conditions, dense steam, and high humidity, generating 4D point cloud imaging and protects patients and respects their privacy. Multifunctional sensing provides instant fall detection and a wide range of presence-based activity tracking.

fall detection sensor

The Tek-CARE750 enables care providers to improve operations by ensuring rapid response to falls, supporting patient-centered care and reducing staff workload.

Wander Management

The Tek-CARE®700 wander management system gives Alzheimer's, dementia and other at-risk residents the ability to move freely about a facility, while preventing them from leaving or wandering into dangerous areas. Tek-CARE700 runs on our Tek-CARE® Appliance Server, and provides resident ID, loiter and door-ajar monitoring, low tag battery and other alerts.

Alert Integration

The Tek-ALERT® alert integration manager allows a facility to integrate calls and activities from hard-wired nurse call, wireless nurse/emergency call, fire alarm, security and access control systems, and route those calls to the appropriate caregiver. Any networked computer utilizing the LS623 event monitor software can display calls and generate activity reports. Smart phones, pagers and email can easily be included to ensure that the right staff member receives the right event notification at the right time.

TekTone® System Integration

Our proprietary Tek-CARE® Appliance Server connects to all our nurse call, wander management, alert integration, and wireless nurse call/emergency call systems. The Tek-CARE Appliance Server displays the calls, events and messages from all connected systems at once. Any computer networked with it can create customizable reports on all activity, and up to 255 networked devices or 255 Tek-CARE TVs can be active on the system at one time. Just add a license for each desired feature.

Tek-CARE® Staff App

Display calls on the go! The Tek-CARE® Staff App improves workflow efficiency and nurse call response time while significantly improving patient satisfaction. The Tek-CARE Staff App runs on up to 255 iOS or Android devices. The Tek-CARE TV for Apple TV can run on up to 255 TVs. (See www.tektone.com for the latest version information.) Each device displays in its assigned zones—from all connected systems at once.
