

# TekTone®

COMMUNICATIONS FOR TODAY ... AND TOMORROW.

## Tek-CARE® 160

Two-way voice communication nurse call system

AFFORDABLE  
TWO-WAY VOICE

### SIMPLICITY

Designed for easy installation and use, making it easy for staff, residents and technicians to interact with the system. The simple system also helps save room in the budget for other needs.

### RELIABILITY

Features two-way audio, providing residents and staff with reliable communication in times of need. Audio is shared over the Tek-CARE Network, keeping communication open even if WiFi is down.

### MODERNITY

The Tek-CARE160 features sleek master stations and customizable stations, and blends in with its surroundings while still providing the vital features needed to ensure resident safety.

# Tek-CARE® 160

Two-way voice communication nurse call system

Tek-CARE160 is a modern and affordable nurse call system that is easy to install, use, and maintain. Featuring customizable peripheral devices, sleek, touchscreen master stations and high-quality two-way voice communication, the Tek-CARE160 is designed to meet the needs of facilities across the entire healthcare spectrum.

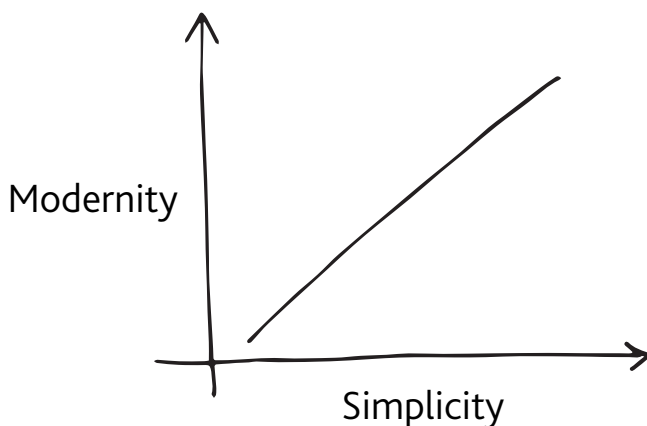

The NC415G3 master station includes the Tek-CARE user interface on a compact, five-inch, LCD touchscreen, as well as an optional audio handset and cradle for placement. With the handset, staff can communicate loudly and clearly with residents between

patient rooms and the nurses station without the interference of background noise. The NC404TS master station features the same Tek-CARE user interface, along with a 22" screen will full touchscreen capabilities. This master includes options for Icon View and Map View in addition to classic List View.

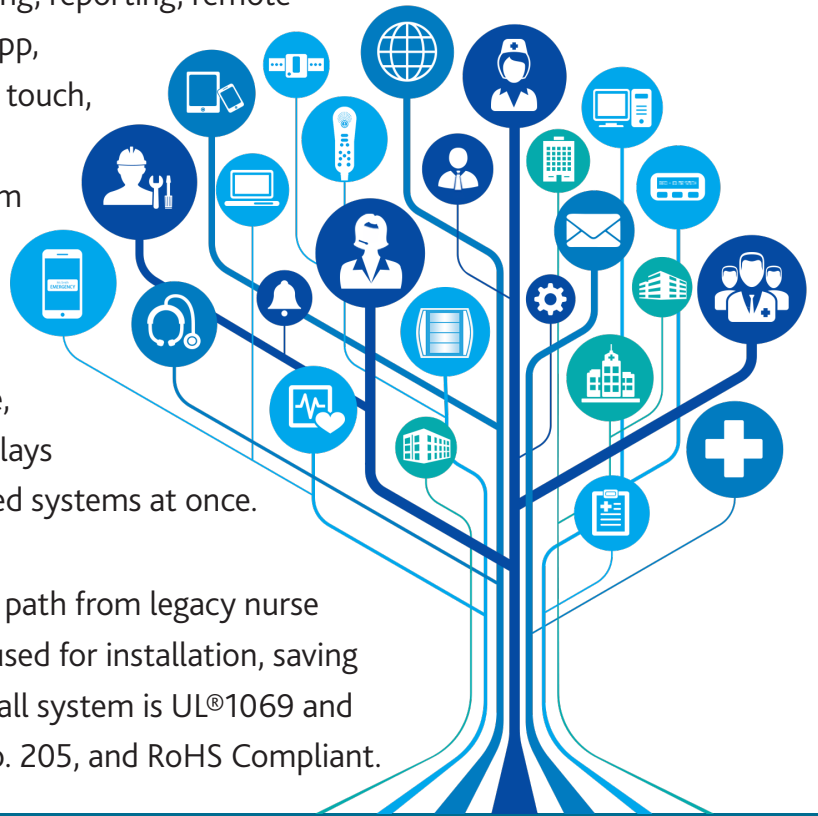

Two-button customizable stations are designed with optional pull cord and include inserts for emergency, code, or bath call stations — or create

custom inserts for call types unique to each facility. These stations can be used in one- or two-gang housings. In the two-gang housing, stations can be combined with other two-button stations, patient stations or even a speaker station to provide audio communication with custom calls. Optional water-resistant gaskets allow the stations to be used in showers, baths, or tub rooms.

Add the Tek-CARE Appliance Server to easily integrate the Tek-CARE120 system with other nurse call systems, as well as a wide variety of building systems. The Tek-CARE Appliance Server supports many features, including pocket paging, reporting, remote event monitors, email output, Tek-CARE TV App, and Tek-CARE Staff App for iPhone, iPad, iPod touch, and Android devices. Apple TVs with HDTVs display calls in a large format that's visible from a distance. Our Tek-CARE Staff App enables iPhone, iPad, iPod touch devices (plus select paired smartwatches), and Android devices to display calls on the go, with selectable tone, vibrate, or flash notifications. Each device displays all calls in its assigned zones from all connected systems at once.

The Tek-CARE160 allows for an easy upgrade path from legacy nurse call systems. Existing wiring can be often re-used for installation, saving on costs and labor. The Tek-CARE160 nurse call system is UL®1069 and UL®2560 Listed, cUL® listed to CSA C22.2 No. 205, and RoHS Compliant.

## SYSTEM FEATURES

- Two-way audio
- Touchscreen masters stations
- Two-button pull-cord stations
- Customizable buttons
- Auxiliary input module
- 1/4" jack call cord stations
- Duty stations
- Dome lights
- Simple wiring

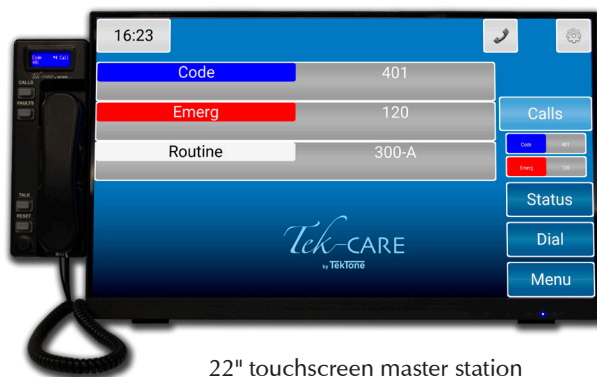

Tek-CARE nurse call systems provide clinical staff with critical communications means and a pathway to more effectively focus their valuable time and energy on patient care. The Tek-CARE platform is a helpful reporting and analytics resource, allowing administration to access reports on workflow, rounding effectiveness, facility events, staffing, request detail and more.

# Tek-CARE160 Components
