

TekTone®

COMMUNICATIONS FOR TODAY ... AND TOMORROW.

Tek-CARE® 300 III

nurse call system

DURABLE &
EFFICIENT

PRODUCTIVITY

2-way voice communication, staff presence devices and multiple ways to send call alerts ensure that all patients are heard, making it easier for the staff to give them the exact care they need.

INNOVATION

Touchscreen master stations, master station map view and mobile capabilities allow the Tek-CARE300III to fit perfectly into today's high-tech healthcare environments.

MANAGEMENT

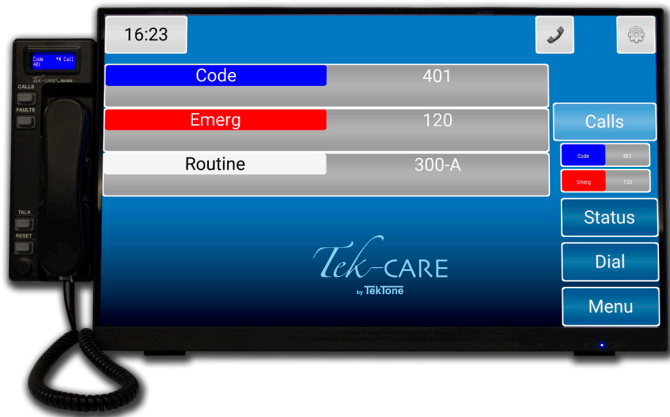

Reporting software provides data on call response times and other metrics for simple assessment of daily practices in order to improve staff efficiency and patient happiness.

Tek-CARE[®] 300 III

Nurse Call System

TekTone's Tek-CARE300III nurse call system provides your facility with everything you need to increase your staff's efficiency and job satisfaction. The system includes all the features and connectivity you expect from an advanced system.

The system's NC404TS Master Station includes a touchscreen monitor that displays pending calls in color, including such information as room description and patient name. The master station is easy to use and provides 2-way audio communication.

The NC415AV Master Station, which can be desk or wall mounted to fit user's requirements, is sleek and compact, allowing for maximum efficiency in a convenient package.

LED dome lights seamlessly blend in with existing decor, virtually disappear when switched off, and eliminate costly bulb replacement.

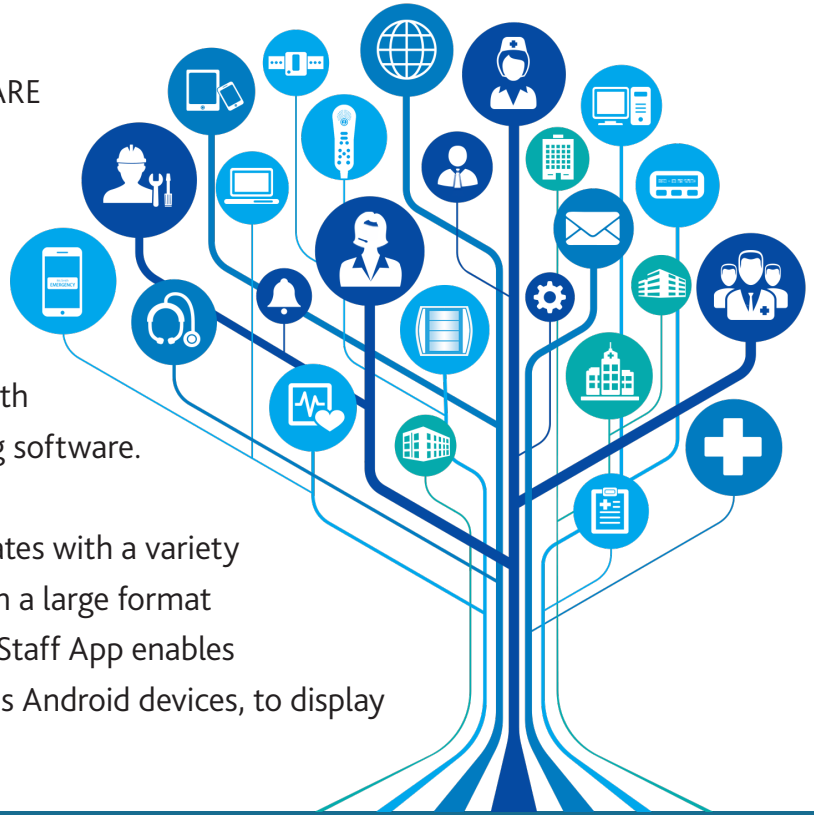

Staff presence registration via nurse/aide presence switches allows you to locate your staff quickly and efficiently—without using overhead paging. Adding the Tek-CARE Staff App for iOS and Android enables communication with staff on the move.

Tek-CARE300III is a fully independent system that does not rely on computers, ensuring reliability and safety. Every component is UL® 1069 Listed for use in skilled nursing facilities, hospitals and medical centers.

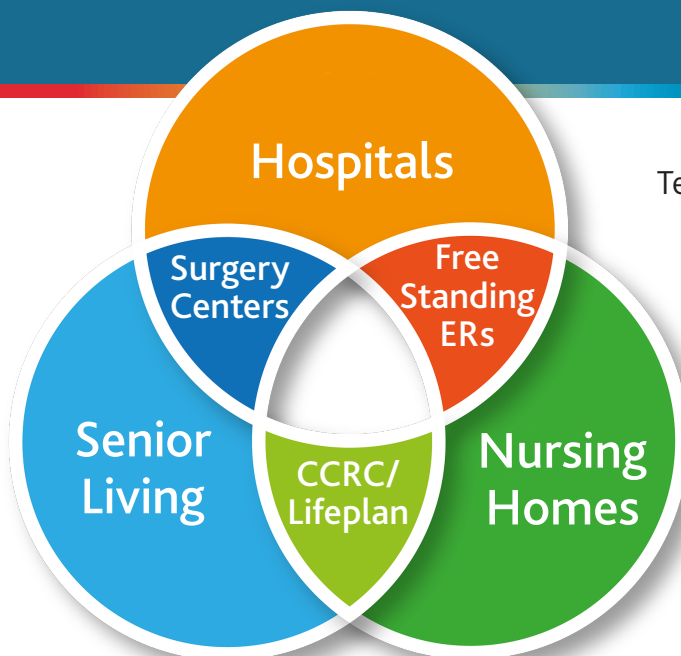

Improve facility efficiency by adding a Tek-CARE Appliance Server with software options including event monitoring, reporting, email output, and enhanced staff paging. Calls are logged to monitor staff response time, facility efficiency, and accountability. Required paperwork can often be replaced with reports generated by the Tek-CARE Reporting software.

The Tek-CARE300III nurse call system integrates with a variety of ancillary systems. Apple TVs display calls in a large format that is visible from a distance. The Tek-CARE Staff App enables iPhone, iPad and iPod touch devices, as well as Android devices, to display calls on the go.

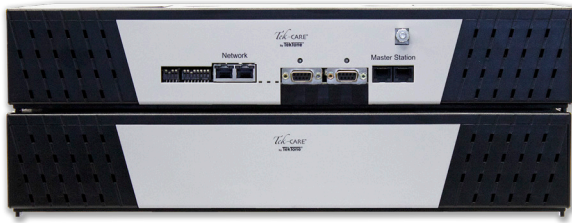

SYSTEM FEATURES

- Touchscreen masters stations
- Map view for identifying call locations
- Full-duplex audio
- 8-pin DIN jack call cord stations
- Reporting
- Dome lights
- Pillow Speakers

Tek-CARE nurse call systems provide clinical staff with critical communications means and a pathway to more effectively focus their valuable time and energy on patient care. The Tek-CARE platform is a helpful reporting and analytics resource, allowing administration to access reports on workflow, rounding effectiveness, facility events, staffing, request detail and more.
