

Tek-CARE150 TekTip: Wiring Connections Necessary to TV Control from the IR157N Patient Station SF301P Pillow Speaker combination

TekTone's IR157N Patient Station, as part of the NC150N/NC200N Nurse Call System, provides fast and reliable communication between nurse and patient.

Calling the nurse, in addition to television control, is accomplished by use of the SF301P Call Cord/Pillow Speaker.

The following wiring information indicates connections necessary to TV control from the IR157N/SF301P Patient Station/Pillow Speaker combination.

Full system wiring information is available by ordering the IL380A NC150N/NC200N Nurse Call manual.
